

Cylinder Cover for Industrial Machinery

This precision-engineered cylinder cover is designed for robust performance in demanding applications. Its precise machining ensures optimal sealing and efficient operation.

Product Overview

Precision-Engineered Cylinder Cover

This high-grade metal cylinder cover is designed for robust performance in demanding industrial applications. Featuring complex geometry with multiple ports and a central conical recess, it is engineered for optimal sealing and efficient fluid or gas flow. Its durable construction and intricate internal passages make it a critical component for maintaining the reliability of large mechanical systems.

Compatibility

2-Stroke Engine Compatibility	S26MC, L35MC, S35MC, L42MC, S42MC, S46MC-C, L50MC, S50MC/-C, L60MC, S60MC/-C, L70MC, S70MC, L80MC, S80MC, K80MC/-C
4-Stroke Engine Compatibility	L16/24, L20/27, L23/30, L23/30A, L28/32, L28/32A, L28/32H

Design Features

Key Design Features

- Complex geometry
- Multiple ports
- Central conical recess
- Intricate internal passages
- Multiple mounting points

Material	High-grade metal
