Product Overview

High-Performance Cylinder Liner

This cylinder liner is engineered for the 8DC8-1 engine, providing a high-quality replacement solution for heavy-duty applications. Constructed from durable iron, it features a built-in firewall to withstand intense operating pressures and temperatures. Precision-machined to exact dimensions, this component ensures optimal piston ring sealing and reduced friction, effectively extending the service life of your engine.

Technical Specifications

Bore Diameter	135 mm
Total Height	229 mm
Flange Diameter	162.5 mm
Cylinder Configuration	8

Compatibility & Identification

OEM Reference
31207-72183

Material & Construction

Material	Iron
Key Features	Firewall Integrated, High-Quality Construction
