

Cylinder Sleeve for Industrial Machinery

This precision-engineered cylinder sleeve is designed for demanding industrial applications. It is constructed from high-strength materials to ensure durability and resistance to wear.

Product Overview

Precision-Engineered Cylinder Sleeve

This cylinder sleeve is designed for demanding industrial applications where reliability is paramount. Constructed from high-strength materials, it offers exceptional durability and wear resistance. The sleeve features a smooth internal bore for optimal piston movement and external grooves for secure installation, finished with a protective coating to prevent corrosion and extend service life.

Technical Specifications

Key Features

- Smooth internal bore for optimal piston movement
- External grooves for secure installation
- Corrosion-resistant protective coating
- High-strength material construction

Markings

BOPAS

Application Compatibility

Industrial Machinery, Heavy Duty, Cylinder Components
