

Cylindrical Air Purifier

This air purifier features a cylindrical design with a perforated base for air intake and a metallic grille for air expulsion. It is engineered for efficient air filtration and quiet operation, making it suitable for both home and office environments.

Product Overview

Compact Air Purification Solution

This cylindrical air purifier offers a sleek, modern design suitable for both home and office environments. It features a comprehensive 3-in-1 filtration system, including a pre-filter, HEPA filter, and activated carbon filter, ensuring efficient removal of airborne pollutants. With adjustable fan speeds and convenient timer settings, it provides a flexible and user-friendly experience for maintaining air quality.
