

# Cylindrical Bass Tube Subwoofer

This compact bass tube subwoofer enhances low-frequency audio performance. The cylindrical enclosure optimizes sound dispersion and space efficiency.

## Product Overview

### Compact Bass Performance

This cylindrical bass tube subwoofer is engineered to significantly enhance low-frequency audio performance in both automotive and home entertainment environments. Its specialized cylindrical enclosure design promotes optimized sound dispersion while maintaining a space-efficient footprint. Designed for versatility, it provides a robust bass response that integrates seamlessly into various audio setups.

## Design & Build

Enclosure Shape	Cylindrical
Ideal Applications	Car Audio, Home Entertainment

## Performance

### Audio Focus

Low-frequency • Bass Enhancement
