Product Overview

Professional Tube Finishing Solution

This cylindrical belt sander is engineered for high-performance finishing on stainless steel round tubes and various cylindrical surfaces. Featuring a 1-driving and 3-driven wheel configuration, it ensures stable, consistent performance during operation. Designed for efficiency and ease of use, it provides precise contour sanding for demanding metalworking and plumbing applications.

Technical Specifications

Power Output

700 W

Motor Power

4800 rpm

Max Speed

Electrical Requirements

Parameter	Value
Rated Voltage	230-240V / 120V
Rated Frequency	50Hz / 60Hz

Operation & Mechanics

Sanding Belt Dimensions	32x550mm
Adjustable Speed Range	1000 - 4800 rpm

Certification & Origin

Place of Origin	Zhejiang, China
