

Cylindrical Diameter Circumference Measuring Tape

This precision tape allows for accurate circumference and diameter readings of cylindrical objects. Constructed from durable stainless steel, it features clear millimeter graduations and a sliding indicator for easy, precise measurements.

Product Overview

Precision Measurement Solution

This cylindrical diameter and circumference measuring tape is engineered for high-accuracy readings in forestry, woodworking, and industrial environments. Constructed from durable stainless steel, it provides reliable measurements for pipes, trees, and other cylindrical objects. The dual-scale system allows for simultaneous diameter and circumference assessment with a clear, easy-to-read sliding indicator.

Measurement Specifications

Diameter Range

20 mm

Min Diameter

300 mm

Max Diameter

Circumference Range

60 mm

Min Circumference

950 mm

Max Circumference

Construction & Features

Material	Stainless Steel
Key Features	Stainless Steel, Sliding Indicator, Dual Scale, High Precision

Applications

Suitable Industries

- Forestry
- Woodworking
- Industrial Manufacturing
- Pipe Inspection
