

Cylindrical Hair Curling Iron

This hair curling iron is designed for creating curls and waves. It features a cylindrical heating barrel and a spring-loaded clamp to hold hair in place during styling.

Product Overview

Professional Styling Performance

The SW-501 series is a professional-grade hair curling iron designed for precision styling and versatile curl creation. Featuring a reliable PTC heating element, this tool reaches optimal temperatures quickly to ensure consistent results. With safety-focused design elements like a 360-degree swivel cord and an integrated power indicator, it combines ease of use with professional-grade reliability for salon-quality hair styling.
