

# Cylindrical Piston Skirt

This cylindrical piston skirt features a metallic gray finish and equidistant bronze-colored bands. It has a hollow interior with a flanged top edge containing evenly spaced holes.

## Product Overview

### Precision-Engineered Piston Skirt

This cylindrical piston skirt is a critical replacement component designed for heavy-duty marine and industrial engines. Featuring a durable metallic finish with specialized bronze-banded detailing, it ensures optimal fit and performance within the combustion assembly. This part is engineered to maintain structural integrity under the rigorous demands of high-output 2-stroke and 4-stroke engine environments.

## Compatibility

### Compatible 2-Stroke Engines

S26MC, L35MC, S35MC, L42MC, S42MC, S46MC-C, L50MC, S50MC, S50MC-C, L60MC, S60MC, S60MC-C, L70MC, S70MC, L80MC, S80MC, K80MC, K80MC-C

### Compatible 4-Stroke Engines

L16/24, L20/27, L23/30, L23/30A, L28/32, L28/32A, L28/32H

## Physical Attributes

### Design Features

- Cylindrical geometry
- Metallic gray finish
- Bronze-colored circumferential bands
- Hollow interior design
- Flanged top edge with mounting holes
