

Cylindrical Stainless Steel Range Hood with LED Lighting

This range hood is constructed from stainless steel 304#/430# and features 3 x 1W LED lights and electronic switch controls. It has a 150mm outlet diameter and provides an air extraction rate of 1000m³/h.

Product Overview

Premium Cylindrical Range Hood

This professional-grade cylindrical range hood offers a sleek, modern aesthetic suitable for high-end kitchen environments. Engineered with a durable stainless steel 304/430 construction, it ensures long-lasting performance and corrosion resistance. Featuring a powerful 1000m³/h extraction rate and integrated LED lighting, it combines efficient air filtration with excellent illumination for your cooking workspace.

Technical Specifications

Extraction Capacity

1000 m³/h

Air Extraction Rate

Motor Power	330 W
Integrated Lighting	3 x 1W LED Lights
Control Interface	Electronic Switch Controls

Dimensions and Build

Dimensions

Parameter	Value
Diameter	350mm
Height Range	600-1100mm
Base Height	70mm
Outlet Diameter	150mm
Material Grade	Stainless Steel 304, Stainless Steel 430
Gross Weight	23 kgs
