

Cylindrical Tower Fan with Vertical Grille

This cylindrical tower fan is designed for indoor use. It features a vertical grille for air output and control buttons for adjusting fan settings.

Product Overview

Professional Indoor Cooling Solution

This cylindrical tower fan is engineered to provide efficient and consistent air circulation for indoor environments. Its sleek vertical design features a high-performance vertical grille and intuitive top-mounted controls for seamless operation. Built for stability and aesthetic appeal, the fan utilizes a weighted circular base, making it an ideal choice for offices, showrooms, and commercial spaces requiring reliable air movement.
