

C/Z Profile Roll Forming Machine

This robust machine efficiently produces C and Z shaped profiles from metal coils. It features a heavy-duty frame, multiple forming stations, and an advanced control system for adjusting parameters.

Product Overview

Professional C/Z Profile Roll Forming Solution

This high-performance roll forming machine is engineered for the efficient production of C and Z shaped profiles. It features a heavy-duty frame for stability, precision-engineered forming stations, and an advanced PLC-based control system for seamless operation. Designed for structural component manufacturing, it offers high-precision hydraulic cutting and reliable production speeds for industrial construction applications.

Technical Specifications

Production Capacity

7 m/min

Max Production Speed

18.5 KW

Power Rating

Physical Dimensions

Parameter	Value
Length	8000 mm
Width	1400 mm
Height	1200 mm
Total Weight	6.5 tons

System Components

- PLC Control: Panasonic or Delta
- Design Software: Copra
- Forming Method: Synchronous
- Hydraulic Cutting System

Certifications and Compliance

Standards & Certifications

CE, ISO 9001:2008, BV Certification

Logistics and Service

Service Support

12 Months Warranty • Overseas Engineering Support

Shipping Requirement

40FCL
