

D Size 1.5V Carbon-Zinc Battery

This D size 1.5V carbon-zinc battery is suitable for general purpose applications. It provides an economical and reliable power source for low-drain devices such as toys and radios.

Product Overview

Reliable Power for Everyday Devices

This D-size carbon-zinc battery is engineered to provide a dependable and economical power source for low-drain household electronics. Designed for versatility, it is an ideal choice for toys, radios, and general-purpose applications requiring standard 1.5V power. With a focus on heavy-duty performance and extended shelf life, these batteries ensure your devices remain powered when needed.

Technical Specifications

Battery Size	D (R20 / UM-1)
Nominal Voltage	1.5 V
Chemistry	Carbon-Zinc
Model Number	ZPG-102B

Performance Features

Performance Class

Super Heavy Duty • Extra Power

Typical Applications

- Toys
- Radios
- Household Electronics
- Low-drain devices
