

# D Size Alkaline Battery LR20 1.5V

High-performance alkaline batteries in size D (LR20) provide a 1.5V power source. These batteries are designed for long-lasting performance in various devices.

## Product Overview

### Reliable Power Solution

These D-size alkaline batteries (LR20) deliver a consistent 1.5V power supply, making them an ideal choice for a wide range of high-performance electronic devices. Engineered for reliability, they provide long-lasting energy to keep your equipment running smoothly. Designed with safety and environmental responsibility in mind, these batteries are completely free of mercury and cadmium.

## Technical Specifications

### Nominal Voltage

**1.5 V**  
Voltage

<b>Battery Size</b>	D (LR20)
<b>Chemical System</b>	Alkaline

## Compliance & Safety

### Safety Warnings

- Do not install backwards
- Risk of explosion or leakage if misused

<b>Environmental Compliance</b>	Mercury Free, Cadmium Free
