

D Size High Capacity Dry Cell Battery with Metal Jacket

High capacity D size dry cell battery featuring a metal jacket construction. Ideal for various electronic devices requiring a reliable power source.

Product Overview

High Capacity Power Solution

This D-size dry cell battery features an advanced metal jacket construction, offering superior reliability for demanding electronic devices. Engineered with high-capacity chemical power, it provides an extended service life compared to standard battery alternatives. The environmentally conscious, mercury-free formulation ensures safe usage without contributing to heavy metal pollution.

Technical Specifications

Size Standard	D Size
Environmental Compliance	Mercury-Free, Eco-Friendly
Housing	Metal Jacket

Key Features

Performance Advantages

- High energy density for prolonged usage
- Superior capacity compared to conventional dry cells
- Wide operational compatibility
- Mercury-free chemical composition
