

D-Style Hydraulic Seal Ring

This D-style ring is designed for creating effective seals in hydraulic and pneumatic applications. The seal's distinct D-shaped profile ensures a tight, reliable barrier against fluid leakage.

Overview

D-Style Hydraulic Seal Ring

The D-Style Hydraulic Seal Ring is a precision-engineered component designed for optimal performance and leak prevention in demanding industrial hydraulic and pneumatic systems. Constructed from high-quality elastomeric materials, these seals offer exceptional resistance to high temperatures, acids, and alkalis. With anti-aging properties and a non-toxic, odorless composition, they provide reliable sealing solutions for a wide range of professional applications.

Material Composition

Available Material Options

NBR, HNBR, EPDM, SILICONE, VITON, NR

Performance Features

Key Properties

High Temperature Resistance • Acid-Alkali Resistance • Anti-Aging • Non-Toxic • Odorless

Service & Customization

Customization Options

- Various colors available
- Multiple size configurations

OEM Services

Yes
