

# D60B52 Double Type B Sprocket

This double sprocket is a type B with 52 teeth and a 3/4 inch pitch. It is designed for efficient power transmission in industrial applications.

## Product Overview

### D60B52 Double Type B Sprocket

The D60B52 is a high-performance double Type B sprocket designed for robust power transmission in industrial settings. With 52 teeth and a 3/4-inch pitch, it is engineered for reliability and efficient torque transfer in heavy-duty machinery and conveying systems. Its durable construction ensures extended wear resistance, making it a dependable component for demanding drive applications.

## Technical Specifications

### Sprocket Type

Double • Type B

### Number of Teeth

52

### Pitch

3/4 in
