Product Overview

Professional Damaged Screw Extractor Set

This 4-piece damaged screw extractor set is engineered for the quick and efficient removal of broken bolts, stripped screws, and damaged studs. Constructed from a robust combination of High-Speed Steel (HSS) and S2 material, these tools are built to handle tough applications, including stainless steel materials. The set features a versatile two-part design, making it an essential addition to any mechanic's or professional's toolkit.
