

Data/Fax/Voice Modem

This data/fax/voice modem is designed for reliable communication. It supports standard modem protocols for data transmission, faxing, and voice applications.

Overview

Versatile Communication Modem

This Data/Fax/Voice modem is engineered to provide reliable communication capabilities for various professional applications. It supports standard protocols for efficient data transmission, faxing, and voice operations. Designed for clear status monitoring, the unit includes multiple indicator lights to track activity and connection status in real-time.

Technical Specifications

Data Speed

56 Kbps

Max Data Rate

Supported Functions

Data Transmission, Faxing, Voice Applications

Monitoring and Indicators

Status Indicators

- RD (Receive Data)
- TD (Transmit Data)
- CD (Carrier Detect)
- OH (Off Hook)
- HS (High Speed)
- TR (Terminal Ready)
- AA (Auto Answer)
- MR (Modem Ready)
- PW (Power)
