

Davit Launched Inflatable SOLAS Liferaft

This davit launched liferaft has a maximum storage height of 18~36m. It is SOLAS approved to ensure compliance with international safety standards.

Product Overview

High-Performance Maritime Safety

The Davit Launched Inflatable SOLAS Liferaft is engineered for rapid emergency deployment and maximum occupant protection on international maritime vessels. Constructed from durable, weather-resistant materials, it features dual inflatable buoyancy chambers and a protective canopy to shield survivors from harsh marine environments. Fully compliant with SOLAS regulations, this liferaft ensures professional-grade safety and reliability for commercial and passenger shipping.
