

DB47937 Needle Roller Bearing for Transmissions

This needle roller bearing is designed for use in PEUGEOT 306 kits. It ensures optimal roller guidance and even load distribution.

Product Overview

High-Precision Needle Roller Bearing

This needle roller bearing is engineered for applications demanding reduced friction and high load capacity. Constructed from high-quality hardened steel, the unit features a robust cage for optimal roller guidance and even load distribution. It is specifically designed to provide reliable performance and extended service life in automotive transmissions, gearboxes, and various industrial machinery.

Technical Details

Key Performance Indicators

1 High

Load Capacity

1 Reduced

Friction Level

Bearing Series

DB Series

Material

Hardened Steel, High-Quality Alloy

Compatibility

Suitable Applications

- Automotive Transmissions
- Industrial Gearboxes
- General Industrial Machinery
