Overview

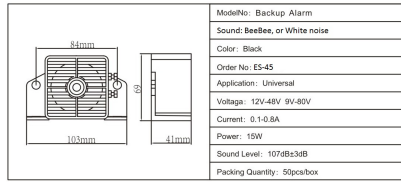

Durable construction suitable for various industrial and automotive environments.

Safety Warning System

The ES45 Reversing Alarm is a robust safety device designed for diverse industrial and automotive applications, including forklifts and cars. It features a wide operating voltage range of 10-80V, ensuring compatibility with various vehicle electrical systems. Engineered for reliability, this alarm provides a clear 107dB audible warning signal to enhance safety during reversing maneuvers.

Technical Specifications

Dimensional overview and technical specifications for the ES45 model.

Sound Level

107 dB

Sound Output

Physical Dimensions

View	Dimension
Front	84mm x 103mm
Side	69mm x 41mm

Model Number	ES45
Operating Voltage	10-80V DC
Sound Options	BeeBee, White Noise
Power Consumption	15 W
Current Draw	0.1-0.8A

Compliance & Logistics

Certifications

CE • RoHS • REACH

Warranty	12 months
Standard Packaging	50 pcs/box
Customization	Yes
