Product Overview

High-Performance DC Centrifugal Blower

This DC centrifugal blower is engineered for optimal performance in air conditioning and ventilation systems. It features a robust design incorporating premium components like NSK bearings and high-quality silicon steel sheets for enhanced durability. With a focus on efficiency and quiet operation, it is an ideal solution for HVAC and industrial air circulation needs.

Technical Specifications

Motor Type	DC Motor
Key Materials	100% Pure Copper Wire, Silicon Steel Sheet
Bearing Type	NSK Bearings

Performance & Quality

Operational Profile

Low Noise • Durable Lifespan

Warranty

36 months

Quality Guarantee
