

DC Compressor for Refrigeration

This DC compressor is designed for refrigeration applications. It operates on a 12/24V power supply and uses R600a refrigerant.

Overview

High-Efficiency DC Refrigeration Compressor

This DC compressor is engineered for reliable performance in mobile and off-grid refrigeration systems. Operating on a versatile 12V/24V power supply, it is optimized for cooling capacities up to 74W. Its compact and robust design makes it an ideal solution for freezers ranging from 30L to 80L in capacity.

Technical Specifications

Cooling Capacity

74 W

Cooling Capacity

Voltage Compatibility	12V, 24V
Refrigerant	R134a
Suitable Freezer Volume	30-80 Liters

Compliance

Certifications & Standards

CCC • CB • CE • RoHS
