

# DC Inverter TIG/MMA Welder

This DC inverter TIG welder is a versatile machine capable of both TIG and MMA welding. Adjustable amperage and pulse settings allow for precise control over the welding process.

## Product Overview

### Professional DC Inverter Welder

This versatile DC Inverter TIG/MMA welder is engineered for high-performance welding on stainless steel and carbon steel surfaces. Utilizing advanced Japanese MOSFET technology, the unit provides stable performance even when subjected to power supply voltage fluctuations. Featuring a dual-function design and an efficient internal fan-cooling system, this welder is built for reliability in demanding professional environments.

## Technical Capabilities

Supported Welding Modes	TIG, MMA
Core Components	Fuji Japan MOSFET

## Operational Features

### Protection & Indicators

- Over-current (O.C.) indicator light
- Voltage fluctuation protection

Cooling System	Internal fan-cooling
----------------	----------------------

## Compliance

### Certifications

CE • ROHS
