Product Overview

High-Performance Roller Door Automation

This high-performance DC motor is precision-engineered for reliable roller door automation systems. Featuring a robust cylindrical design and a secure square mounting flange, it ensures stable operation and straightforward integration into modern door mechanisms. Designed for efficiency and endurance, this motor is an ideal choice for residential and commercial electrical appliance applications.

Technical Specifications

Key Features

- Robust cylindrical body design
- Square mounting flange
- Direct drive shaft connection
- High-efficiency power output

Design Specifications

1 Square Flange
Mounting Type

Motor Type	DC Motor
Primary Applications	Roller Door Automation, Household Electrical Appliances
