

DC Power Supply for Fog Machines

This DC power supply is designed for fog machine applications. It provides reliable and stable DC power, ensuring consistent performance and longevity.

Product Overview

Dual-Function Power Solution

The D300 is a versatile power unit designed to provide simultaneous AC power generation and DC electric welding capabilities. Engineered for both mobile and stationary applications, it utilizes high-performance permanent magnetic materials to eliminate the need for carbon brushes, significantly enhancing reliability and welding performance. This unit is ideal for industrial environments requiring a dependable, dual-purpose power source.

Technical Specifications

Rated Speed	3000 RPM
AC Power Output	1500 W
AC Voltage	220 V
AC Frequency	50 Hz

Welding Capabilities

Compatible Welding Rod Diameter	2.0 - 6.0 mm
Supported Materials	High Carbon Steel, Low Carbon Steel, Alloy Parts

Key Features

Operational Advantages

- Simultaneous AC power and DC welding
- Brushless design for higher reliability
- High-performance permanent magnetic material
- Suitable for mobile or stationary use
- Ideal for field construction and lighting

Performance Highlights

3000 RPM
Operating Speed

1500 W
AC Output
