

DC Powered Solar Stand Fan

This DC solar powered stand fan provides energy-efficient cooling for homes and offices. Its multi-blade design ensures optimal airflow, while adjustable height and speed controls offer customized comfort.

Product Overview

Energy-Efficient Cooling Solution

This DC solar-powered stand fan is designed as an energy-efficient cooling solution suitable for both residential and office environments. Engineered for versatility, it features a multi-blade design to ensure optimal airflow and adjustable height settings for customized comfort. Its direct current operation makes it fully compatible with solar panel systems, offering a reliable choice for off-grid or energy-conscious cooling needs.

Technical Specifications

Power Source	DC Solar Powered
System Compatibility	Solar Panel Systems, Off-Grid Ready, DC Power Systems

Design & Features

Key Features

- Multi-blade design for optimal airflow
- Adjustable height for customized comfort
- Sturdy base for stability
- Variable speed control settings

Ideal Applications

Home Use • Office Use • Off-Grid Locations
