

DC Pulse TIG Welder

This is a DC pulse TIG welder. It features adjustable parameters, remote control, and multiple welding functions.

Product Overview

Versatile DC Pulse TIG Welder

This advanced DC Pulse TIG Welder is designed for professional-grade performance across a wide range of applications. Featuring multi-voltage compatibility (1PH & 3PH, 160V-460V) and an IGBT inverter, it ensures reliable operation even when powered by generators. With specialized capabilities for thin plate welding down to 0.3mm and support for cellulose electrodes, this machine offers the precision and flexibility required for demanding industrial tasks.

Technical Specifications

Voltage Compatibility	1PH & 3PH, 160V-460V
Welding Modes	TIG, MMA, Pulse TIG, Cold Welding
Inverter Technology	IGBT

Performance Features

Thin Plate Welding

- 0.3mm
- 0.5mm

Arc Control

Adjustable ARC Start • Adjustable ARC Force • Instant Arc Ignition

Compatibility

Generator Compatible, Cellulose Electrode Compatible

Design & Build

Build Quality	Special dustproof structure
