

DC Submersible Water Pump

This submersible pump is designed for efficient water transfer in various applications. It features a durable construction with a stainless steel housing and a robust motor for reliable performance.

ADDITIONAL IMAGES

Product Overview

Intelligent DC Brushless Technology

The SQX Intelligent DC Brushless Submersible Pump utilizes advanced integrated circuitry to deliver high-performance water management. Designed for versatility, it operates seamlessly with batteries and solar panels, making it an ideal solution for off-grid environments. Whether for farmland irrigation, fish pond management, or garden maintenance, this durable pump offers an energy-efficient alternative for various water transfer needs.

Technical Specifications

Construction Materials

- Stainless steel housing
- Reinforced polymer
- Robust motor
- High-efficiency impeller

Compatible Power Sources

Battery, Solar Panel, DC Power

Operational Safety

Safety Instructions

- Disconnect power before installation or maintenance
- Do not operate while people are in the water
- Avoid use in flammable liquids
- Professional repair required for damaged power cords

Applications

Ideal Applications

Farmland Irrigation • Fish Pond Management • Garden & Forest Spraying • Well Water Transfer • Drainage
