

DDR SDRAM Memory Module

This Double Data Rate (DDR) SDRAM module enhances system responsiveness and multi-tasking capabilities. Featuring a standard DIMM form factor, it is compatible with a wide range of motherboards.

Overview

High-Performance Memory Upgrade

This DDR SDRAM memory module is engineered to significantly enhance system responsiveness and multitasking capabilities for desktop computers. Featuring a standard DIMM form factor, it offers broad compatibility with a wide range of motherboards. With gold-plated pins ensuring reliable connectivity and signal integrity, this module is an ideal solution for upgrading or replacing existing memory to improve performance in demanding applications and gaming.

Technical Specifications

Memory Type	DDR SDRAM
Form Factor	DIMM
Key Features	Gold-plated pins, Integrated circuit chips, Signal integrity
