Product Overview

Enhance Comfort and Efficiency

These decorative ceiling fans are designed to improve indoor air circulation and temperature regulation, effectively reducing the load on air conditioning systems for better energy efficiency. Engineered with a high-quality silicon steel motor, they provide reliable, low-noise operation suitable for any room. With reversible blade designs, integrated lighting, and versatile control options, these fans blend aesthetic appeal with practical functionality for both residential and commercial spaces.

Key Features

Core Features

- Integrated lighting fixture
- Reversible blade patterns for dual styling
- High-quality silicon steel motor
- Low-noise operation
- Winter and summer mode compatibility
- Remote and wall control options

Performance Metrics

Operating Metrics

5500 m³/h

Air Volume (Base Model)

178 RPM

Rotation Speed (Base Model)

58 W

Input Power (Base Model)

Technical Specifications

Model Specifications

Model	Power (W)	Speed (RPM)	Airflow (m ³ /h)	Diameter (mm)
GFC-525	58	178	5500	1320
GFC-565	62	160	6000	1422
GFC-524	55	190	5500	1321
