

# Deep Groove Ball Bearing 6014-RS 6020-ZZ 6315 6417

Deep groove ball bearings are widely used and can accommodate axial loads in both directions, as well as radial loads, even at high speeds. Some are pre-lubricated and available with metal shields and rubber seals for low noise and vibration.

## Overview

### Deep Groove Ball Bearings

These high-quality deep groove ball bearings are designed for a wide range of industrial applications, offering reliable performance and durability. Engineered to ensure smooth operation and reduced friction, they are capable of handling both radial and axial loads efficiently. Suitable for high-speed environments, these bearings are manufactured to meet rigorous international quality standards.

## Certifications

Quality Standards

ISO 9001:2008

## Available Series

### Supported Series

- 6000 Series
- 6200 Series
- 6300 Series
- 6400 Series
- 6800 Series
- 6900 Series
- R Series
- RLS Series
- RMS Series

### Sealing Options

Open • ZZ (Shielded) • 2RS (Sealed) • Z (Shielded) • RS (Sealed)
