

Deep Groove Ball Bearing 6204ZZ

This deep groove ball bearing is designed for high-speed operation in demanding industrial applications. Its hardened steel construction ensures durability and efficient performance for electric motors, pumps, and gearboxes.

Product Overview

Deep Groove Ball Bearing 6204ZZ

This deep groove ball bearing is engineered for high-precision industrial applications, offering reliable performance and durability. Designed to handle both radial and axial loads, it is an ideal component for electric motors, pumps, gearboxes, and other rotating machinery. The construction utilizes hardened steel to ensure smooth operation, minimized friction, and maximized energy efficiency during high-speed use.

General Information

Model Number	6204ZZ
