

Deep Groove Ball Bearing 6216-ZN

This deep groove ball bearing offers good quality, long life and high performance. The versatile bearing has solid outer rings, inner rings, and ball and cage assemblies.

Overview

Deep Groove Ball Bearing 6216-ZN

The 6216-ZN is a versatile, self-retaining deep groove ball bearing designed for high-performance applications. Featuring a robust construction with solid outer and inner rings, this bearing is engineered for reliability, low frictional torque, and suitability for high-speed operations. Its simple design ensures ease of maintenance, making it an excellent choice for a wide range of industrial machinery.

Key Features

Performance Highlights

- High quality construction
- Extended service life
- High performance operation
- Low frictional torque

Technical Details

Bearing Type	Deep Groove Ball Bearing
Model Number	6216-ZN
Design Features	Self-retaining, Solid outer ring, Solid inner ring, Ball and cage assembly
