

Deep Groove Ball Bearing 6300-2RS

This deep groove ball bearing is designed for high speeds and handles both radial and axial loads. The 6300-2RS features rubber seals on both sides for enhanced protection and grease retention.

Product Overview

High-Performance Deep Groove Ball Bearing

The 6300-2RS is a single row deep groove ball bearing designed for versatility and high-speed performance. Equipped with dual rubber seals, it offers superior protection against contaminants and ensures long-term grease retention. This bearing is an ideal component for electric motors, pumps, and various industrial gearbox applications.

Technical Specifications

Sealing

2RS - Rubber seals on both sides

Bearing Type

Single row deep groove ball bearing

Material

Bearing steel

Key Features

High speed, Low maintenance, Radial and axial load capacity

Applications

Common Industrial Applications

- Electric motors
- Industrial pumps
- Gearboxes
