

Deep Groove Ball Bearings

Deep groove ball bearings designed for high speeds and radial loads. These bearings feature precision-ground raceways and high-quality steel balls for smooth operation and extended life.

Product Overview

High-Performance Deep Groove Ball Bearings

These deep groove ball bearings are engineered for high-speed operation and efficient handling of radial loads. Featuring precision-ground raceways and high-quality steel balls, they ensure smooth operation and extended service life in demanding environments. They are versatile components suitable for a wide range of industrial applications, including electric motors, pumps, and gearboxes.

Technical Specifications

Bearing Type	Deep Groove Ball Bearing
Series	62200-62300 Series
Key Features	High Speed, Radial Load Capacity, Precision-Ground Raceway, High-Quality Steel

Applications

Suitable Applications

- Electric Motors
- Industrial Pumps
- Gearboxes
- General Machinery
