

Deep Hole Twist Drill Bit

This drill bit is designed for creating deep holes. It is available in straight shank (4-16mm) and taper shank (10-25mm) variations.

Product Overview

High-Performance Deep Hole Drilling

These deep hole twist drill bits are engineered for precision and efficiency in demanding drilling applications. Featuring specialized parabolic flute designs, they facilitate superior chip evacuation, ensuring clean and accurate holes in wood, metal, and plastic. With options for both straight and taper shanks, these tools provide robust performance and secure chuck grip for professional metalworking and woodworking tasks.

Technical Specifications

Flute Design

Parabola

Available Shank Types

- Straight Shank
- Taper Shank

Straight Shank Diameter Range	4 mm
Straight Shank Max Diameter	16 mm
Taper Shank Diameter Range	10 mm
Taper Shank Max Diameter	25 mm

Application

Compatible Materials	Wood, Metal, Plastic
