

Deep Well Submersible Pump

This deep well submersible pump is a multistage centrifugal pump designed for efficient water extraction. Its stainless steel construction provides durability and corrosion resistance.

Product Overview

High-Efficiency Submersible Pumping

This multistage centrifugal submersible pump is engineered for reliable water extraction from deep wells. Constructed with durable, corrosion-resistant materials, it is built to withstand demanding environments while maintaining optimal performance. Its compact design ensures straightforward installation in narrow well casings, making it an ideal solution for irrigation, domestic water supply, and industrial applications.

Technical Specifications

Performance Metrics

1.5 HP

Power (HP)

1100 W

Power (Watts)

106 m

Max Head

76.6 L/min

Flow Rate

Model

4SP3/17

Construction & Design

Key Features

Stainless Steel Construction, Corrosion Resistant, Multistage Centrifugal Design, Compact Design

Applications

Suitable Applications

- Agricultural Irrigation
- Domestic Water Supply
- Industrial Water Systems
