Overview

Professional Demolition Solution

This high-performance demolition hammer is engineered for heavy-duty construction and renovation tasks. It delivers high impact energy specifically designed for efficient breaking of concrete, masonry, and asphalt. With integrated vibration reduction technology and an ergonomic adjustable handle, it ensures operator comfort and precise control during extended professional use.

Performance

Key Features

- High impact energy for hard materials
- AVT (Anti-Vibration Technology)
- Variable speed control
- Quick-change chuck system
- Robust motor for demanding conditions

Primary Functions

Chiseling, Mining, Slotting, Cutting, Shoveling

Applications

Common Applications

- Pipe laying and plumbing
- Machinery installation
- Water supply and drainage construction
- Interior decoration and remodeling
- Port and infrastructure engineering
- Asphalt pavement removal

Compatible Materials

Concrete • Brick • Asphalt • Masonry • Rock

Design & Ergonomics

Operator Comfort

- Vibration reduction technology
- Adjustable auxiliary handle
- Ergonomic grip design

Construction

Heavy-duty robust construction with durable components for job site longevity
