Product Overview

Heavy-Duty Demolition Performance

This heavy-duty sledge hammer is engineered for demanding tasks including demolition work, driving stakes, and breaking concrete. It features a robust, drop-forged steel head that has been heat-treated to ensure maximum impact resistance and long-term durability. The design prioritizes user safety and efficiency, making it an ideal tool for professional construction, landscaping, and demolition projects.

Technical Specifications

Head Material	Drop forged steel
Head Finish	Black matt lacquered
Strike Surface Hardness	50 HRC
Hardness Range	HRC 45-55

Handle & Ergonomics

Handle Material	Hardwood, Fiberglass
