Product Overview

Professional Grade Bristle Brush Head

This dense bristle brush head is engineered for precision and durability in industrial or specialized applications. Featuring a tightly packed arrangement of natural bristles or bristle mixtures, it ensures controlled and even distribution of materials, whether for cleaning, dusting, or coating processes. The robust construction within its cylindrical base makes it a reliable component for consistent, long-term performance.

Technical Details

Design Features

- Tightly packed bristle density
- Uniform bristle length
- Durable cylindrical base
- High-precision application capability

Bristle Material	Natural Bristle, Bristle Mixture
Available Sizes	All sizes available
