

Desktop Aluminum Foil Sealing Machine

This desktop machine seals containers with aluminum foil using electromagnetic induction. It features adjustable conveying speed and accommodates various container sizes.

Product Overview

Desktop Aluminum Foil Sealing Solution

This automatic electromagnetic induction aluminum foil sealing machine is designed for efficient, reliable desktop operation. It features an air-cooled system, adjustable conveying speed, and precise sealing capabilities to ensure airtight integrity for a wide range of containers. With an adjustable height mechanism, it easily accommodates various bottle sizes, making it an ideal choice for food, pharmaceutical, and consumer goods packaging lines.

Key Features

Compatible Applications

Sauce bottles, Dried fruit containers, Candy & snacks, Pesticide bottles, Pharmaceutical bottles, Honey jars, Hair care products, Beverage bottles, Tea & biscuit cans
