Product Overview

Desktop Instant Hot and Cold Water Dispenser

This desktop RO water purifier offers a 6-stage filtration process with an integrated heating system, providing instant access to purified water without the need for complex plumbing. Designed for convenience, it features multi-stage temperature control and a 3-second rapid boiling capability. Its compact, portable footprint makes it an ideal solution for homes, offices, or any space where high-quality hydration is required.

Technical Specifications

Power Rating	2100 W
Voltage/Frequency	220V/50Hz
Heating Capacity	18L/h (<90°C)
Water Pressure	0.4-0.6MPa
Ambient Temperature Range	4-38°C

Capacity & Performance

Tank Capacities

6 L Raw Water Tank	1.3 L Wastewater Tank	3 L Filtered Water Tank
------------------------------	---------------------------------	-----------------------------------

Initial Water Flow	130 ml/min
--------------------	------------

Features

Filtration System

- RO Reverse Osmosis Technology
- PAC Composite Filter
- Rear Composite Carbon Rod Filter

Temperature Modes

Cold, Warm, Hot

Body Material

ABS
