

# Desktop Interphone Paging System with Gooseneck Microphone

This is a desktop interphone and pager system. It features a gooseneck microphone, integrated speaker, and external speaker unit.

## Overview

### Professional Desktop Interphone Paging System

This desktop interphone and paging system is engineered for clear, reliable two-way communication in office and commercial environments. The unit features a flexible gooseneck microphone for optimal positioning and an integrated speaker system for immediate audio feedback. Designed with intuitive controls for volume, talk, and listen functions, it provides a streamlined solution for paging and inter-office interaction.
