

Dew Point Temperature Meter with Data Logging

This dew point meter accurately measures dew point temperature. It features a built-in printer for on-site data logging and a USB OTG port for data transfer.

Product Overview

Precision Dew Point Measurement

This portable dew point meter is a self-contained instrument designed for accurate, rapid humidity and temperature monitoring in industrial environments. It features a specialized desiccant dry-down chamber to speed up measurement times and includes built-in self-diagnostics upon startup. With an integrated printer and intuitive touchscreen interface, it offers a complete, user-friendly solution for on-site data logging and analysis.

Measurement Performance

Key Performance Metrics

-70 °C

Min Dew Point Range

35 °C

Max Dew Point Range

1 °C

Accuracy

1.5 L/Min

Max Flow Rate

Features & Connectivity

Device Capabilities

- Integrated printer for on-site logging
- USB OTG port for data transfer
- Touchscreen interface
- Desiccant dry-down chamber
- Self-diagnostics on startup
- Automatic switch-off

Engineering Units

°C, °F, ppb(v), ppm(v), ppm(w), g/m3, lb/MMSCF

Power & Hardware

Battery Life	10 Hours
Rechargeable	Yes
Coupling	Quick Connect Stainless Steel
