

Diagonal Cutting Pliers with Ergonomic Grip

These diagonal cutting pliers are designed for clean and precise cuts on wires, cables, and small components. They feature hardened steel jaws and ergonomic handles.

Product Overview

Precision Cutting Performance

These diagonal cutting pliers are engineered for high-precision tasks, offering clean and accurate cuts on wires, cables, and small components. Built with hardened Chrome Vanadium Steel jaws, they ensure long-lasting durability and reliability in demanding environments. The ergonomic handle design and integrated spring-loaded mechanism work together to reduce hand fatigue, making them an ideal tool for electronics assembly, jewelry making, and general repair work.

Technical Specifications

Cutting Capacity

1.6 mm

Copper Wire

Material	Chrome Vanadium Steel
-----------------	-----------------------

Features

Key Features

- Ergonomic handle design
- Spring-loaded mechanism
- Hardened steel jaws

Applications

Typical Applications	Electronics Assembly, Jewelry Making, General Repair
