

Diamond Abrasive Tools

Diamond tools are engineered for cutting, grinding, and polishing a variety of hard materials. They provide precision, durability, and efficiency in professional applications.

Product Overview

High-Performance Diamond Abrasive Tools

These high-performance diamond tools are engineered for demanding professional applications, including cutting, grinding, and polishing. Designed for exceptional durability and efficiency, they ensure clean cuts and smooth finishes on a variety of hard surfaces. Whether working with concrete, stone, or tile, these tools deliver the precision required for high-quality project results.

Technical Specifications

Primary Functions

Cutting • Grinding • Polishing

Configuration Options

- Multiple size options
- Various grit levels

Suitable Materials

Concrete, Stone, Tile
