

Diamond and CBN Grinding Wheels

Diamond and CBN grinding wheels offer high abrasive capability and precision. These wheels provide high productivity, cost-effective performance, and easy maintenance for demanding industrial applications.

Product Overview

High-Performance Grinding Solutions

These diamond and CBN grinding wheels are engineered for high-precision industrial applications, offering exceptional abrasive capabilities. Designed for demanding tasks, they provide high productivity and cost-effectiveness while ensuring easy and clean maintenance. They are suitable for both wet and dry grinding operations on hard materials like carbide, ceramics, hardened steel, and glass.

Key Features

Performance Benefits

- High abrasive precision
- High productivity
- Cost effective operation
- Easy and clean maintenance
- Excellent wear resistance
- Superior surface finish

Technical Details

Suitable Materials

Carbide • Ceramics • Hardened Steel • Glass

Abrasive Types

Diamond, Cubic Boron Nitride (CBN)

Operation Modes

Wet Grinding, Dry Grinding
