Product Overview

Professional Ceramic Cutting Solution

This diamond cut-off wheel is engineered specifically for the precision cutting of ceramic materials, including porcelain and other brittle surfaces. It features a continuous rim with diamond grit to ensure smooth, chip-free cuts, while integrated expansion slots effectively dissipate heat to prevent warping during extended operation. Designed for compatibility with angle grinders and tile saws, this tool is an essential asset for professional tile installers seeking durability and performance.

Technical Specifications

Available Sizes & Configurations

Diameter (mm)	Thickness (mm)	Teeth/Segments
120	1.0	EXL
125	1.8	12T
130	1.975	10T
155	2.0	12T
180	2.0	14T

Key Features

Continuous Rim, Heat Dissipation Slots, Precision Balanced, Diamond-Impregnated, Steel Core

Usage Information

Compatible Equipment

- Angle Grinders
- Tile Saws

Target Materials

Ceramic Tiles • Porcelain • Brittle Materials
